Registering
made easy

You can register online at: www.giftregistry.Sears.ca if that's your preference, but it's a good idea to stroll through the entire store to get fresh ideas for your home.

Bring this handy guide with you to your Sears store. As you browse through the store, simply scan the items you want added to your registry.

So much to choose from in many different brands. Every product offers its own design, so ensure that your choice delivers exactly what works best for you.

You can add to your registry at any time; do it online, by telephone or in-store.

To ensure that your wish list is complete, take it room by room. Start a list for each room, beginning with the major pieces, and then add those accessories that showcase your own personality.

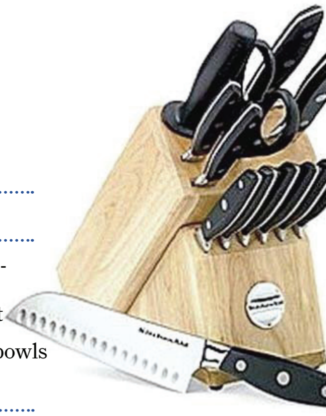
Cooking couples

Suddenly everyone's a chef!
And it's not a stretch to realize that any hobby – but especially cooking – needs the right tools.

You're not going to boil potatoes in a fry pan or an egg in a double boiler. Every cook knows that beginning your arsenal of kitchen products starts with a collection of pots and pans and bakeware, because every item is built for a specific task. Great knives are a terrific investment, too, because the good ones are easy to keep honed and they last for years. Check out our full range of Kenmore appliances, along with our top national brands for every type of coffee maker, blender, mixer, toaster, toaster oven, slow cooker and more. Then look at the endless accessories, from colanders to ice cream scoops that make your work so much easier.

When your list is complete, start thinking about organizing your kitchen.

MISSION: **KITCHEN ORGANIZATION**



COOKWARE: Consider attaching wire baskets inside your cupboards to hang pot lids. Suspended ornamental ceiling racks can house your pots and pans if you're short of cupboard space.

UTENSILS: Beware of the 'junk drawer' syndrome. Use dividers to keep every type of item separate.

CUPBOARDS: Dishes will be beside the sink and dishwasher. Most-used foods are best stored in the easy-to-reach cupboards. This includes canned soup, vegetables and fruit. Top shelves will be reserved for items that are seasonal or used less often. Lower shelves will hold pots and pans (if not hung from the ceiling), mixing bowls and small appliances that are not in daily use.

SMALL APPLIANCES: Everyday items will be on your counter as well as your show piece, perhaps a colourful standmixer or food processor. Set up a work triangle of easy movement between stove, fridge and sink.

FOOD PREP: Have a clear area on your counter top to prepare food with cutting boards, measuring cups, cooking utensils and mixing bowls close at hand.

FUN IN THE KITCHEN

Part of the satisfaction in cooking is working with a partner and experimenting with new recipes. Start by shopping together – and shopping ranges from buying kitchen appliances to the weekly food shopping. Plan your meals for the week and, to save time, often cook in batches so at least half of the food can be frozen.

Taste, test, set a pretty table and, together, savour the entire experience.
Here's to you!

Your family room is your haven at the end of a busy day.

Relax! Enjoy!

Your family room can sometimes explode in clutter. The secret is to create calm by finding a place for everything you use.

We all collect our share of games, videos and toys and, over time, the question becomes, how and where do we store them for easy access without making the room seem crowded? And what are the decor options that give a room personality?

The family room's basic furnishing requirements tend to take up a lot of space and it can take a little creativity to give the room your own personal stamp.

In most family rooms, the big TV is standard. Plan to arrange your larger pieces of furniture around your television, such as a sofa flanked by two comfortable chairs. But this is just the beginning.

YOUR GOAL: **PRACTICAL SOLUTIONS**

Now look at the remaining space. You will want to add a coffee table, lamp tables, lamps and accessories to personalize your room.

In this much-used and informal room, choose sofas and chairs with easy-care coverings and a practical coffee table with a stain-resistant finish (especially water marks).

Your family room is where you escape to relax and where you will entertain your friends. A home theatre sound system, DVD player and game console are key accessories for your 'great room'.

An attractive storage cabinet is a great addition to a family room. Avoid bulky ones. Today, cabinet manufacturers are producing designs that are taller and slimmer. The height provides extra storage, while the slim design doesn't intrude into the room.

DISCOVER NEW SPACES

Items that are used less often can find homes in other places. Walk through your home and identify wall areas that can accommodate shelving. A corner curio cabinet might hold items that need a safe place, such as your camera, camcorder, and other electronic gadgets or games.

To fully enjoy your family room, make it easy to clean, easy to keep organized and then accessorize it to reflect your own personality.

Family or friends often go together on a special gift such as a TV or furniture

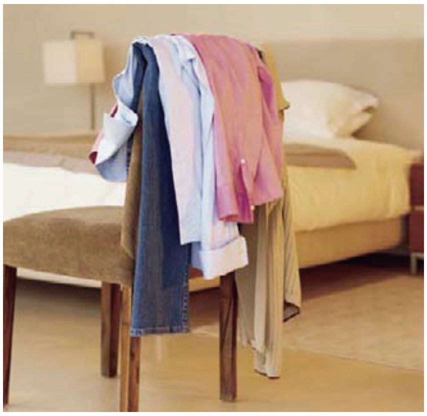
Create a bedroom that is your own private sanctuary.

Sleep on it

The bedroom invites snuggling in comfort – and a little glamour doesn't hurt!



In most master bedrooms, you're dealing with a large queen- or king-size bed that dominates the room, so the bed is the automatic focal point. It deserves great bedding and throw pillows to make it come alive.

It all starts with the choice of bedding. The comforter or duvet and throw pillows set the stage. Then, think about the sheets, which are all about easy-care and comfort.

Good sheets may start with the choice of fabric, but they're also about thread count. The higher the count, the finer the sheet. An example would be the Whole Home 100 percent Pima cotton bedding with the lovely feel of the cotton sateen fabric and a thread count of 400 threads per square inch. (Available in six colours with a 16-inch fitted sheet depth for a newer mattress.) Be sure to register for a minimum of three sets of sheets for your bed and include the mattress pad and pillow protectors to extend the life span of good bedding.

THE PROMISE: **TO BE WRAPPED IN COMFORT**

COLOUR SPRINGBOARD: If you choose a patterned comforter or duvet, use that pattern to give you colour direction in the rest of the room. A beautiful print is given more significance by repeating its colours in the whole room, from the walls to the upholstery of a chair.

In a small room, keep your palette neutral and show restraint. Limit yourself to just one pattern and create balance with solid fabrics in drapery and upholstery.

If you have a side chair in the room go for glamour in your choice of fabric, such as velvet, faux suede or leather.

Downplay a room's deficiencies. If, for example, you have narrow crown moulding or baseboards, don't accent them. Paint them the same colour as the walls so they disappear.

THE MASTER BATHROOM

Towel sets have a bath towel, hand towel and face cloth. But also treat yourself to an oversize towel that will wrap you in comfort. As towels are used every day, you will need three sets for each bathroom.

Accessories will dress up the bathroom; add the coordinating accessories for the designer look.

At the end of the day, your goal is to make your bedroom cozy and inviting. Your great escape from the stress and problems of the day.

A new mattress is often a newlywed's first purchase for their home

☐ Onyx

Onyx is a striking mix of an alternating pieced horizontal embroidered graphic design and a menswear jacquard forming a chic contemporary look. Decorative pillows are embellished with unique accents that create distinctive details to this ensemble. Coordinated with 250 thread count, 100% cotton sheets. **Included:** **sham** (70858) and **neckroll** (70868)

Twins, double and king sizes are available at Sears Retail Stores, catalogue centres and through Sears.ca.

☐ Odeon

Odeon is a delicately patterned geometric bordered jacquard in calming natural colours with gold shimmery accent threads. It has a soft, textural effect with gros grain ribbons sewn on the top and reverses to a solid coordinate. Decorative pillows are embellished with embroidery and metal buckles. Sheet sets are solid brown, 250 thread count, 100% cotton with an embroidered trim. **Sham** (70258), **Square pillow** (70265), **Breakfast pillow** (70263), **Neckroll** (70264) and 70870. Twins, double and king sizes are available at Sears Retail Stores, catalogue centres and through Sears.ca.

Cool toolbelts are a great addition for your home and your registry.

Essential tools for
Inside and out

Why do we think that the toolbox belongs to a man when we know that today, more than a few women also like to use a hammer and saw. Admittedly though, it is more often the man who says, “I’ll fix it!”

Fixing it or building it, it all starts with the right tools. Whether your workshop is set up in the basement or consists of a toolbox in a cupboard, organized storage is key. A large multi-drawer toolbox can be labeled to allow quick and easy access to nails, screws and small fittings of all types.

Some bulkier equipment can be hung on the wall and sturdy open shelving will take care of the rest. With an organized workshop in place, the question becomes “which project will we take on first?”

Begin by walking through your home and taking note of areas that require extra storage space. Mounting shelves is generally easiest and will help keep your rooms organized.

THE GARAGE OR WORKROOM: **A TON OF POSSIBILITIES**

SHELVES: Shelving in a garage is essential because it provides an enormous amount of extra storage. It needs to be super-strong so it can withstand heavy items. Stainless steel, wood or thermo-fused melamine are the preferred materials for this type of shelving. Dust is a problem in any garage, so plan on installing some closed storage as well.

CABINETS: Modular resin storage cabinets are ideal because they are low maintenance and strong. All storage pods and cabinets in a garage should be waterproof and fire resistant for safety and protection.

CLOSETS: **CREATIVE AND IMAGINATIVE**

THE BEDROOM: Custom-designed storage solutions help to maximize your space, or perhaps you can design and build your own closet units. Double the use of space by having one section with two-level hanging to accommodate blouses, jackets and pants. Another section will be needed for full-length clothing. Include open shelving for folded sweaters and shirts. Slanted shelves and cubbies are ideal for shoes. If you’re building drawers, consider drawer glides with polymer-bearing wheels

GIVING AND GETTING *everything*

Have you thought about adding tools for the workshop or the garden to your registry? Think beyond the traditional items . . . need a lawnmower and garden furniture? Or maybe a snow blower? A cordless drill or table saw also would make great gifts! Just watch a man’s face light up when one of these becomes a new addition to the home (and one of his favourite “toys”).

Have a place for everything. The challenge, after using an item, is remembering to return it to its home!
